

Center for **Advanced** Film Manufacturing

ADVANCEDFILM.ORG

The Center for Advanced Film Manufacturing was created to provide customized training programs for the performance film industry. It prepares future employees for a career in advanced film manufacturing and related industries.

New Advanced Film Certification Program

The curriculum includes customized film-handling training to prepare students for positions at Eastman Chemical. Students will

work on real-world machinery that is found in leading performance film companies. However, 80% of what the students learn is applicable to any advanced manufacturing environment.

See other side for our breakdown of the 1-2-3 Program Phases. ▶

Courses include:

IND 195: Intro to Manufacturing and Advanced Films Technology

MEC 140: Intro to Mechatronics

SAF 126: Principles of Industrial Safety

IND 101: Quality Assurance Technology

IND 295: Topics in Advanced Films Technology

The New College Institute houses a \$1 million, one-of-a-kind academic coater for hands-on training. The machine is used by students in the certification program, Eastman employees, and outside industry experts in the related fields of coating and laminating.

A 3-Phase Approach: Taking Training to a New Level

Phase 1

Manufacturing and Advanced Film Technology Certification

- Entry-level manufacturing curriculum, suitable for operators.
- Program started Fall 2014 with 40+ students enrolled
- Program to generate 20+ graduates by Spring 2015

Phase 2

High-level training in performance films; suitable for lead operators, technicians and young engineers

Phase 3

In-depth training for industry experts, and others in the related fields of coating and laminating

Ongoing Education in Window Film Tinting and Installation

Organizations Involved The Center for Advanced Film Manufacturing is an innovative collaboration between higher education, economic development and Eastman.
